Store Supplies Order Guide

Revision: January 2025

LEXMARK TONER CARTRIDGE INFORMATION

Effective Q1 2021, all stores and clinics receive laser printer toner cartridges and imaging units from the CVS distribution centers. Now, instead of receiving new toner from Lexmark in exchange for an empty cartridge, your store's DC will automatically ship toner in the regular delivery when the toner's capacity has 20 days of life expectancy remaining. The following instructions have been updated to reflect new processes.

Lexmark is no longer monitoring voice mail, all communications should be done via [Service Channel](#).

Store colleagues must open a ticket in service channel:

- a. Create a New Work Order and Select Front Store or Pharmacy > Select Printers in Problem Type.
- b. Answer all prompts to provide Lexmark with details necessary to provide service to your store.
- c. Check the work order for updates or questions from Lexmark.

NEED AN ADDITIONAL TONER CARTRIDGE OR IMAGING UNIT?

Create a ticket in Service Channel

LEXMARK TONER CARTRIDGE RETURN INSTRUCTIONS:

- 1- It is imperative that the empty cartridges and end-of-life imaging units are sent to Lexmark immediately after removal from the printer.
- 2- Unpack the new cartridge or imaging unit and save the packing materials. Use this box for the return of the empty cartridge or imaging unit. A UPS return label can be found **INSIDE the box**. Affix the UPS label to the outside of the carton.
- 3- Give the packaged cartridge or imaging unit to your UPS carrier. Do not call for a pick-up. (There is a fee when you call for a special pick-up.) You must give the package to the UPS driver when he/she brings a delivery to your store.

HAVE A DEFECTIVE CARTRIDGE OR IMAGING UNIT?

Create a ticket in Service Channel

HAVE A TONER OR IMAGING UNIT NOT COMPATIBLE WITH YOUR CURRENT PRINTERS?

Create a ticket in Service Channel
